

No one knows exactly when did the first mutants started to appear, but there were rumors about people with strange powers even before the population was expelled from the Megalopoli. The fact is that their ranks have increased notably since people have been forced to live in the Wasteland. Mutants are not very popular, the fact is that everyone calls them Mutards now, a derogative name that might come from the union of "mutant" and "bastard". As a rule of thumb Mutards are not very well equipped, as usually nobody trades with them, but they possess a wide array of mutations that can counter that drawback.

This box contain: Bobblehead, Mutard (medium blade and extra limb), Mutard (mace and sure feet), Mutard (small blade, organic missile and frog) and Mutardess (medium blade, sharp tail, brutal charge and three boobies).

Nadie sabe exactamente cuándo comenzaron a surgir los primeros mutantes, pero ya antes de que la gente fuera expulsada de las Megalópolis había rumores sobre gente con extraños poderes. La cuestión es que, desde que la gente vive en el Páramo, su número se ha incrementado notablemente. Los mutantes no suelen ser demasiado populares, de hecho, han pasado a ser llamados por todos mutardos, un nombre despectivo que puede venir de la unión de las palabras mutante y bastardo. Por regla general, los mutardos no están muy bien equipados, ya que comúnmente nadie comercia con ellos, pero cuentan con una variedad de mutaciones que puede contrarrestar eso.

Esta caja contiene: Cabezón, Mutardo (filo medio y extremidad adicional), Mutardo (maza y piernas seguras), Mutardo (filo pequeño, proyectil orgánico v rana) y Mutarda (filo medio, cola afilada, carga brutal y tres tetas).
